Dear Michael,

Please feel free to include our solar position algorithm within your open source project. The only thing is not to forget the right reference to the authors and the paper.

Regards,

Diego Alarcón

Asunto: License of sunpos.cpp

Hello PSA,

I want to use this <http://www.psa.es/sdg/sunpos.htm> lib in an open source project running under GPL3. Is it possible to use it? What license is it?

Best Greenting,
Michael Geramb
